

HLRCC Symposium 2024

on behalf of the HLRCC Alliance

June 20th 2024 18:00 - 20:00 CEST

Introducing the HLRCC Alliance

HLRCC (Hereditary Leiomyomatosis and Renal Cell Carcinoma) remains an underdiagnosed condition and the patient path to get the right diagnosis is often long and difficult. Even an established HLRCC diagnosis leaves patients with uncertainty relating to prognosis and treatment. Besides, guidance for the treating physicians remains limited. Consequently, a team of HLRCC experts and patients set out to address this large, unmet need and created the HLRCC alliance. The HLRCC Alliance connects clinicians with basic researchers, physician scientists and patient advocacy groups. We invite you to join us on our first HLRCC Symposium on World Kidney Cancer Day 2024.

Register for the HLRCC Symposium 2024

The HLRCC Symposium 2024 is held as an online webinar.
